

# We Didn't Playtest This at All!

## The Rules:

The objective of the game is to win! If you lose, you have not won, and you are in fact out of the game. If everyone except you has lost, you win!

To begin the game, shuffle all the cards together and deal two to each player. Pick someone to go first, as randomly as possible!

On your turn, draw one card from the deck, and then play one card from your hand. Just follow the instructions on the card! After you're done, play passes to the player on your left.

You might notice that some of the cards are Star Cards. This is because they are clearly superior to normal cards. To maintain game balance, every player has an equal chance of drawing a Star Card from the deck on their turn.

# **Chaos Pack Expansion**

Also included with the game is the Chaos Pack -- the cards that are laid out horizontally. These are separate from the main deck. Don't shuffle them in! If playing with the Chaos Pack Expansion, place one card from it into play to start each game. If you're daring, place two!

Any player failing to do an action a card says they "must" do immediately loses.

## **Blank Cards**

As an extra double bonus, we've included some blank cards! Make up your own crazy rules to add to the game. Remember, fun is good, and simple is better!

A good rule to remember is to make sure a card will be funny and useful after the first time. There are several rock/paper/scissors cards so that players don't know which one it is, for example.
